The Global Educator: Leveraging Technology for Collaborative Learning & Teaching

Modern learning must be global, providing inter-cultural understanding and collaboration to personalise learning, achieve curriculum objectives and bring the world to students. Educators must be empowered and learning environments must be connected in order to 'flatten' learning around the globe. This calls for a shift in pedagogy, a shift in mindset and the integration of digital and online technologies. In *The Global Educator: Leveraging Technology for Collaborative Learning and Teaching*, author and global education forerunner Julie Lindsay shares pedagogical approaches and examples to empower educators and education leaders to make meaningful connections.
