

## MOTIVATING GIFTED STUDENTS (The Practical Strategies Series in Gifted Education)

**AUTHOR:** Del Siegle and D Betsy McCoach  
**PUBLISHER:** Hawker Brownlow Education 2017  
**REVIEWER:** Ingrid Lange

Motivating the underachieving gifted student within the classroom program can be an area of concern and frustration for some teachers and parents. This practical book, *Motivating Gifted Students* is an easy to read and practical reference source for educators, parents and counsellors. The authors identify the many factors that may impact on students who seem capable of achieving outstanding performances but fail to realise their academic potential.

*Motivating Gifted Students* organises various aspects of student attitudes into the chapters, citing relevant research-based information and making connections for the reader to motivate students to gain skills through ongoing learning. Aspects such as the student's personal value and purpose, student connectedness, the use of immediate and relevant feedback, and the importance of influential role models are addressed in a clear and practical way.

Within each chapter there are Motivation Tips for parents and educators to use as suggested strategies in supporting gifted students who are underachieving within the learning environment.
