

SUMMIT

MARZANO — Research —

28–29 March 2019 Brisbane

Sofitel Brisbane Central

OVERVIEW

The Marzano Research Summit is the leading school transformation event that translates research into practical strategies educators can use to significantly advance student achievement. This event comprises keynotes, workshops and resources based on Dr. Robert J. Marzano's 50 years of education research, combined with action research conducted in schools.

Dr Marzano and his team of experts and authors create a professional learning experience like no other on the Australian calendar. Each speaker at the Summit will place a strong emphasis on research-based practices in the areas of curriculum development, instruction, assessment, teacher support and development, student engagement and personalised competency-based education.

Join our expert Marzano team at this event to receive the most revered and acknowledged evidence based information on how to improve your education system and school to effect positive change in students' lives.

Topics include:

- The New Art & Science of Teaching: Reading
- The New Art & Science of Teaching: Writing
- The New Art & Science of Teaching: Assessment
- Academic Vocabulary
- Engaging Learners
- Guaranteed and Viable Curriculum
- Leading High Reliability Schools
- Developing Reflective Practice

KEYNOTE DESCRIPTIONS

ROBERT J. MARZANO — VIA VIDEO

The Changing Role of the PLC Process Across the Five Levels of School Reform

Robert J. Marzano outlines the histories of two powerful movements: professional learning communities (PLC) and High Reliability Schools (HRS). Merging these two influential approaches can dramatically advance the effectiveness of schools. Dr. Marzano details a model for how these processes converge when leading and lagging indicators are the areas of focus.

DR JANELLE WILLS

Enhancing Teacher Quality for Australian Educators

The New Art and Science of Teaching is revolutionising the way schools approach improving teacher quality in their schools. In this keynote, Dr Wills will outline the key approaches and strategies schools are focusing on in their efforts to support the ongoing development of teachers to genuinely impact student learning. Janelle makes a case for why you need to focus your school and classroom efforts on the proven key instructional elements and strategies that ensure all students achieve academic success. She will summarise the key changes required to enhance teacher quality.

JAN HOEGH

High Reliability Teachers – Maximising Learning, Minimising Risk

The Marzano Research High Reliability Teacher™ (HRT) encourages and celebrates teacher effectiveness. In this keynote, Jan will encourage delegates to consider how we recognise teachers who make an incredible difference to the lives of their students and offer participants to reflect upon their own practice and development as teachers. She will outline a multi-levelled process that recognises the advancement of a teacher's pedagogical skills and knowledge in the specific areas of instructional strategies, student learning and valid and rigorous feedback.

PHIL WARRICK

Leading a High Reliability School: It's About Action, Not Position

High reliability leadership is not a function of having a specific personality type or demeanor; it is a function of data informed action aimed at continuous improvement. Leaders must recognise their challenge does not merely involve putting new strategies and structures in place. It also involves establishing systems that help monitor the health and effectiveness of those strategies and structures in order to take immediate action before problems become school wide failures. In this keynote, Phil will share behaviours and strategies for leading people, examine personal and professional leadership strategies and connect leadership opportunities to specific areas in the High Reliability Schools framework.

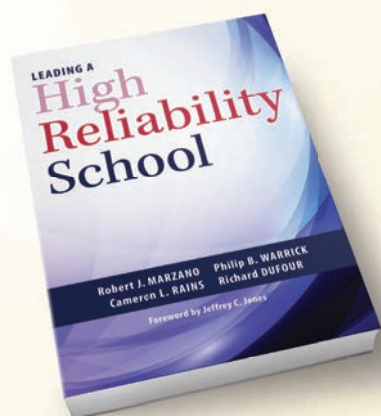

AGENDA

Thursday, 28 March
