## INSTRUCTION SERIES

Instructions and activities for the diverse classroom

Use the differentiated instruction series to meet the diverse learning needs of your students

These books contain activities that will engage students of varying ability levels, learning styles and areas of interest. The activities have been developed to incorporate important learning concepts into activities that secondary school students will find interesting and relevant.

Differentiation strategies within this series apply knowledge of Gardner's multiple intelligences, and include student-centred activities, varying approaches to assessment, flexible grouping options and flexible time to complete projects according to students levels and needs.

Books within this series include Middle Years Science, Maths, Social Studies and English, as well as English for Years 9-12.

- Reproduction and Heredity, Regulation and Behaviour, Populations and Eco-Systems.

#### Earth and Space Science

- Structure of the Earth System.

### Differentiated Instruction for English, Middle Years (5-9)

Rannah Jones • 9781742396668

Differentiated Instruction for English contains twenty English activities that will engage students of varying ability levels, learning styles and areas of interest. All of the activities encompass several of the multiple intelligences. The lessons are designed to provide you with models of differentiated instruction to meet the diverse learning needs of your students. You can

either use these lessons as they are presented, or adapt them to your own curriculum. It is hoped that these lessons will further serve as a springboard for you to use your own ingenuity to rework lessons to meet the unique abilities of all students.
