

MAKE THE FUTURE!

HANDS-ON SUSTAINABILITY LESSONS

Nansi Kunze

The **Make the Future!** series is a cross-curriculum **STEM** resource that gives real meaning to the idea of sustainability. Each book in the series contains activities for two year levels, designed to supplement Australian Curriculum instruction by addressing the **Sustainability** cross-curriculum priority, as well as reproducible worksheets and teachers' notes. **Make the Future!** brings sustainability to life in the classroom, while empowering your students to make a tangible difference to their future – and to have fun at the same time!

OUR ONLY EARTH A Framework For Geographical Problem Solving

Both humanity and Mother Earth have suffered greatly from human insensitivity. Not only are we rapidly depleting the planet's resources and polluting its air, land and water, we also waste our financial resources on destructive expenditures.

Sustainability – both social and environmental – is the overarching theme of all seven books in the **Our Only Earth** series. Through fact cards, activities and journals designed to get students thinking about social and environmental sustainability, each book based on the integrated **Our Only Earth** framework explores real-life geographical issues and suggests possible solutions, culminating in a summit at which students create action plans and seek ways in which to alleviate global problems.

Updated to show correlations to the Australian Curriculum, both specifically within the subject of geography and generally across all learning areas.
