# The Mathematics Program Improvement Review

Authors: Ron Pelfrey

**Date Available:** 1 March 2007  
**ISBN:** 1 74170 252 6  
**Code:** 105126  
**RRP:** \$45.95  
**Format:** A4, 226 pp  
**Age Range:** P-12  
**Category:** Assessment  
**Subject:** Maths

## Key Selling Points:

- Tried and tested maths program evaluation process used by hundreds of schools
- Review your maths program against ten essential standards
- Includes guidelines, questionnaires and forms: everything you'll need for program assessment
- Review, practise and train your maths team to maximise program effectiveness

## Summary:

Regardless of how well your students are scoring on standardised maths tests, test scores can't tell you which aspects of your program are moving students from proficient to advanced and why some students are falling behind. To get a total picture of maths learning, hundreds of schools in urban, suburban, and rural districts use the detailed, research-based evaluative process described in this book.

An award-winning maths educator and textbook author provides you with all the steps you need to review how well your maths program stacks up to ten essential standards.

Included are guidelines for forming your maths review team, plus all the materials you need to conduct the review, such as:

- Questionnaires and templates for interviews and classroom observations
- Forms for compiling ratings and generating a final report

Tips and handouts for review team training and practice activities
