## Summary:

In *Activating the Desire to Learn*, veteran educator Bob Sullo shows how to apply lessons from research on motivation in the classroom. Sullo believes we are all driven to fulfil five essential needs: to connect, to be competent, to make choices, to have fun and to be safe. Studies show that when these needs are met in schools, good behaviour and high achievement naturally follow. Written as a series of candid dialogues between the author and students, teachers, counsellors and administrators, this book covers everything you need to know to change the dynamics of learning in your classroom or school.
