Summary:

One of the most effective ways to implement the research-based instructional strategies from Classroom Instruction That Works is to use them with educational technologies. This book shows you how and gives you hundreds of lesson-planning ideas and strategies for every year level and subject. Discover new educational tools that support research-based instruction, and learn ways to use technologies you already know. Getting this guide ensures you always know when to use educational technologies, which ones are best for a learning task, and how they help students use new learning strategies.
