Code: 108049
RRP: \$32.95
Format: A4, 328 pages
Year Level: Professional Development
Category: Marzano Resources
Subject: Instruction

Summary:

Implementing the action steps from the bestseller *The Art and Science of Teaching* is much easier when you use this in-depth resource for workshops, professional learning communities, teacher training and self-help.

Hundreds of samples, guidelines, checklists and activities help teachers in all year levels and subjects become instant experts on Robert Marzano's breakthrough framework for effective instruction.

A series of 25 modules equips any classroom teacher with a logical planning sequence that ensures you: establish learning goals and track progress; help students interact with new knowledge, test hypotheses and develop deep understandings; engage students and plan good lessons and units; establish good classroom management and effective relationships with students; and communicate high expectations for learning.

The strategies illustrated here provide a thorough grounding in the "science" of teaching. How a teacher chooses to implement them constitutes the "art" of teaching. Both elements are necessary for improving student achievement and creating successful schools. For anyone committed to developing a wide range of teaching skills, this handbook is a welcome road map to best practices.
