Summary:

In *Teacher Evaluation That Makes a Difference: A New Model for Teacher Growth and Student Achievement*, best-selling author Robert J. Marzano and teacher-effectiveness expert Michael D. Toth lay out a framework for the “next generation” of teacher evaluation: a model focused on helping educators develop and improve their practice. By taking into account multiple accurate, data-rich measures of teacher performance and student growth, the model ensures that all teachers receive fair, meaningful and reliable evaluations. The book includes:

- Standards, rubrics and suggested rating methodologies
- A detailed, five-phase plan for implementing the model
- Guidelines for calibrating evaluation criteria according to teachers' experience levels
- A guide to creating a coaching program for teachers who require intervention
- Recommendations for using technology platforms to enable teacher collaboration

Teacher evaluation has too often focused on affixing ratings to teachers rather than helping them grow into mastery. The practical, field-tested model proposed in this essential new book has everything your school or district needs to provide teachers – and, by extension, their students – with the support necessary for success.
