| Category: | Professional Development |

Summary:

Dimensions of Learning: Teacher's Manual is an instructional framework on cognition and learning, and teaches that learning has five dimensions: positive attitudes and perceptions, acquiring and integrating knowledge, extending and refining knowledge, using knowledge meaningfully and productive habits of mind. This manual is a valuable tool for reorganising curriculum, instruction and assessment. It discusses the five dimensions in detail, and describes hundreds of teaching strategies that support them. This updated and expanded second edition includes a new section on performance and rubrics.

Key selling points:

- The Dimensions of Learning model is an extension of a comprehensive research-based framework on cognition and learning.
- Helps teachers and administrators study learning through the Dimensions model.
- Provides guidance for those who are using the model.
- A valuable tool for reorganising curriculum, instruction and assessment.
