## Summary:

This revised 2014 edition of *World Geography Series: Antarctica* presents an overview of the geography of the continent of Antarctica. This engaging resource is designed to aid primary teachers in teaching the topic of continents in alignment with the Australian Curriculum: Geography Knowledge and Understanding strand for Years 4–6.

Each entry in the series is divided into five sections: Space, Place, Environment, Interconnection and Regions, with each section containing a selection of teaching pages, maps, activities, interesting facts, review questions and puzzles or games. Topics include:

- Where on Earth Is Antarctica?;
- Animals in Antarctica;
- Technology Affects the Environment;
- Movement Includes People, Ideas and Products; and many more.

Books in the World Geography Series can be used to support integrated learning with respect to a range of geography topics from the Australian Curriculum, including sustainability, the environment, cultural diversity, and the natural and built features of places. Further, the World Geography series has been designed to facilitate the integration of geography study with other subjects, including English, Civics and Citizenship, History and the Arts.
