Code/SKU: 614037
RRP: \$345.00
Format/Page No.: DVD
Year Level: Teachers and Administrators
Focus Area: Curriculum, Professional Development
Key Learning Area: Cross-Curricular

Summary

Your school is in the midst of unpacking, integrating and implementing the Common Core State Standards. It's the kind of refocus that requires a clear and committed response from the teachers and schools. To help teachers meet the challenge, Harvey F. Silver, R. Thomas Dewing and Matthew J. Perini have identified six best strategies for transforming instruction.

Back by more than 40 years of field research and hands-on classroom testing, the core six strategies are proven methods that not only increase student engagement and achievement, but also prepare students for tertiary-level education and career success.

In this video, see the core six strategies come to life within six classrooms across different subjects and year levels. You'll witness teachers capturing students' interests, using discussion and questioning techniques to extend their thinking, and asking them to synthesise and transfer their learning.

The Core Six Strategies for the Classroom provides practical, common sense methods for tackling the Common Core standards and bringing out the very best in your students.
