Year Level: Teachers and Administrators
Focus Area: Gifted and Support,
Professional Development
Key Learning Area: Cross-Curricular

Summary

Millions of school-age children in the US are under-resourced and at risk of failure in school. Financial resources are important, but mental, emotional, relational, parental and other key resources are vital to student success.

Under-Resourced Learners identifies resources all students need and delivers proven, practical strategies for building up these resources for every student in every school. Teachers and administrators will find a gold mine of best practices and interventions that will change their classrooms and change the minds and lives of their students.

You'll discover new ways to:

- assess student resources to determine the best strategies and interventions
- build mental, language, relationship and other resources into your teaching
- work more effectively with parents and community representatives
- increase support systems for all students and their families
- monitor every student's progress and adjust efforts to increase student success.

This revised and updated edition includes a detailed study guide, activities for teacher training, an all-new Strategy 8 and more. Perfect for F–12 teachers, staff, administrators and anyone interested in F–12 professional development.
