Summary:

Under-Resourced Learners DVD: Teaching Appropriate Behaviours and Procedures, Strategy 5 from the Under-Resourced Learners series, accompanies the book by the same title and is a perfect fit for staff development, staff meetings or an in-house book study. In this DVD, Dr Payne states that the real purpose of discipline is to have a safe environment so that learning can actually occur, and the first thing in any environment that makes it safer is whether or not there are relationships of mutual respect. Other components of a safe environment include: A system-wide approach to discipline; using the “adult voice”; biochemical issues; administrative support; and The Law of Truly Large Numbers. This DVD describes ways to bring both emotional and physical safety to the school environment.
