Extensions in Mathematics

Book A - Student Book (Set of 5)

Authors: Susan DeStefano and Pamela Halloran

Date Available:	22 January 2007
ISBN:	1 74170 122 8
Code:	CA10109
RRP:	\$99.00 (Set of 5)
Format:	96 pp, A4, softcover perfect bound
Age Range:	Upper primary
Category:	Problem solving, graphic organisers, assessment
Subject:	Mathematics

Key Selling Points:

- Comprehensive structured program to allow students to reinforce, consolidate and extend maths strengths
- Allows students to make use of graphic organisers

Summary:

The *Extensions in Mathematics* series is a program that uses graphic organisers to teach mathematics strategies. Through teacher-directed instruction and scaffolded models, students are well-prepared to find solutions and apply and explain the skills learnt. Maths strategies covered include Number Sense, Measurements, Addition, Subtraction, Multiplication, Geometry, Time and Money, and more. Each strategy is explored in depth and the range of skill levels are built up through the levels A to H. *Book A* sets the foundations for numeracy explored through the series, though *Extensions* can easily be used beginning at any required level.

The *Extensions* component of the CAMS, STAMS and CAMS II series builds on the wide range of skills developed through the series and can be used to reinforce, consolidate and extend maths strengths.
