## Summary:

Strategies to Achieve Mathematics Success provides students with explicit instruction of 16 maths topics, which cover both concepts and skills, that have been identified as the most important instructional goals for each year level.

Each *STAMS<sup>®</sup> Plus* student book contains 16 highly scaffolded, five-part lessons. Each of these lessons helps students to become independent learners as they are moved through each of the five parts: modelled instruction, guided instruction, modelled practice, guided practice and independent practice. In this way, students are required to use increasing degrees of higher-level thinking to analyse and explain their answers as they move through practice problems that increase in difficulty, ultimately building student proficiency and confidence.

*STAMS<sup>®</sup> Plus* level C is targeted at students in years 3 and 4, and assesses the following strategies:

Place value	More fact strategies	Model equivalent fractions	Plane figures
Add and subtract	Division concepts	Benchmark fractions	Length
Multiplication concepts	Fact families	Compare fractions	Perimeter
Fact strategies	Fraction concepts	Fractions greater than 1	Picture graphs and column graphs

Each lesson in the 2013 Australian edition of *CAMS<sup>®</sup> Plus*, *STAMS<sup>®</sup> Plus* and *Solve<sup>®</sup>* has been aligned with corresponding Australian Curriculum content descriptions.
