

# Quick-Maths: Handbook for Everyday Mathematicians: Advanced (Set of 5)

Author(s): Christopher Forest

**Date Available:** 16 June 2014  
**ISBN:** 978 1 74239 583 8  
**Code/SKU:** CA4443  
**RRP:** \$20.00  
**Format/Page No.:** A4, 40 pages  
**Age Group:** 9–12, Professional Development  
**Topic:** Leadership  
**Learning Area:** Maths

## Summary:

Becoming independent problem solvers is an important step for all students to make in mathematics, signalling that learners are ready to move from the pages of a textbook to everyday problem-solving situations.

The *Quick-Maths Handbook for Everyday Mathematicians: Advanced* is a handy reference guide that illustrates maths concepts with rich examples and explanations. Each concept is introduced by a broad statement on the essential idea, and is then refined with detailed explanations of different facets of the concept. This guide features 30 mathematical concepts, including

- exponents,
- measures of central tendency,
- properties of operations, and more.

A list of commonly used maths symbols is included at the back of the handbook, as well as common measurement tools, and frequently used formulas and conversions.
