

Quick-Maths: Handbook for Everyday Mathematicians, Intermediate

Author(s): Christopher Forest

Date Available: 27 October 2010
ISBN: 978 1 74239 444 2
Code: CAS4442 (CA4444)
RRP: \$20.00
Format: A3, 40 pages
Year Level: Primary, Years 3–5
Category: Mathematics
Subject: Basic Skills

Key Selling Points:

Summary:

Help make your students independent problem solvers with these handy reference tools that illustrate basic concepts with rich examples and explanations.

The QUICK-MATHS Handbook for Everyday Mathematicians, Intermediate, contains mathematical terms and definitions in alphabetical order. Key ideas and examples go along with each and every term. There is also space for students to write notes while studying subject content.

At the end of the handbook is a list of symbols, abbreviations and measurement tools students are likely to encounter in your mathematics curriculum.

Common mathematics concepts covered in this clear and easy to use reference guide are: Place value; Area and volumes; Estimating; Averages; Conversion; Coordinates; and Algebra.
