- 11) No special material or equipment is needed.
- 12) Duplication of assessments can be avoided.
- 13) Screening can be accomplished reliably, validly and accurately.

Summary:

The BRIGANCE Screens are used to identify children who need further evaluation and to assist with program planning. They are quick, easy to use and cost effective. A screening session takes no more than 12-15 minutes per child. Results yield an overall picture of development. Skills and procedures are designed to provide a positive screening experience for the children, parents and teachers. The Screens assist teachers with: program planning, special-service referrals, parent communication, and mandated screening compliance. The Screens are flexible for individual or group testing. Parent questionnaires add valuable information to the screening process. Test observations are quickly recorded on convenient 2-part data sheets. No special materials are needed. Scores are easily calculated. Data sheets assist in communicating results during the parent meeting. The Screens: are criterion referenced, provide supplementary advanced-skills assessments, include teacher and parent rating forms, and have been thoroughly researched and field tested. Ages 3 years to 4 years and 11 months.
