RRP: \$23.95
Format: A4, 20 pp duplicate
Age Range: Three-Year-Old Child
Category: Assessment
Subject:

Key Selling Points:

- Screening can be accomplished reliably, validly and accurately
- Quick and effortless to ensure a positive experience for both assessors and students
- Easy-to-use data sheets facilitate communication between assessors, parents and teachers

Summary:

The Three-Year-Old Child Basic Assessments should be used for children aged 3 years to 3 years and 11 months. The norms established from the study and the new cut-off scores are used to detect children with difficulties and to identify those who may be gifted and academically talented. It is required that all basic assessments at the Three-Year-Old Child level be administered, following the directions and scoring procedures in strict accordance with the directions accompanying each basic assessment.

The Three-year-Old Child Data Sheets are for use with the Preschool Screen-II. These duplicate carbonless sheets are designed for recording the child's personal information; recording screening responses and observations and calculating scores; and communicating results with staff and parents.
