Category:	Early Years Development
Subject:	Assessment

Key Selling Points:

- Chart students' progress in the standardised assessments in the IED-II
- Communicate results and improvements easily and quickly with parents and teachers
- Save valuable time on record-keeping

Summary:

The Inventory of Early Development-II is used in early childhood programs, preschools and day-care centres. In addition to helping identify "at risk" infants and preschoolers, the IED-II tracks development, assists with instructional planning and is useful for communicating with parents. Features of the Inventory of Early Development-II include: Social and Emotional Skill Section; Comprehensive Skill Sequences; and Updated References.

The Inventory of Early Development includes over 200 developmental, readiness and early academic skills assessments in 11 major skill areas: perambulatory motor skills and behaviours, gross-motor skills and behaviours, fine-motor skills and behaviours, self-help skills, speech and language skills, general knowledge and comprehension, social and emotional development, readiness, basic reading skills, manuscript writing and basic maths.

The Standardised Assessments Record Book is used to record scores for an individual student who has been given the standardised sections of the IED-II.
