Summary:

The time has come to change the context of school leadership!

The role of the principal is pivotal to systemic school change. That is the fundamental message of Michael Fullan's book, examining the moral purpose of school leadership and its critical role in 'changing the context' in which the role is embedded. In this bold step forward, Fullan calls for principals to become agents as well as beneficiaries of the processes of school change. In an effort to make the position more rewarding and exciting, he shifts the principal's role from one of a site-based superman or superwoman, and recasts it as one in which principals figure prominently both within the school and within the larger school system that surrounds them.
