## **Summary:**

From the author of the best-selling *How the Brain Learns* and *How the Special Needs Brain Learns* comes a new book dealing with gifted and talented students. *How the Gifted Brain Learns* helps you turn research on the brain function of intellectually and artistically advanced students into practical classroom activities and strategies. Offering real strategies for real classrooms, *How the Gifted Brain Learns* is an indispensable tool for all educators – school administrators, teachers, staff developers, pre-service students, and even parents who want to better understand their gifted children and help them reach exceptional levels of performance.

## **Key selling points:**

- An internationally renowned author in the area of brain research and science education.
- Offers practical advice and effective strategies for all educators dealing with gifted students.
- Helps identify and support gifted students who are underachievers or learning disabled.
- Allows parents to better understand their gifted children.
- By better informing parents and educators, this book will help gifted children reach exceptional levels of performance.

## **Supporting resources:**

- *The Leadership Brain* – CO0701
- *How the Brain Learns, Third Edition* – CO0965
- *How the Special Needs Brain Learns* – CO1171
- *How the Brain Learns to Read* – CO071X
