Age range:	Professional Development
Category:	Brain-based Learning, Bloom's Taxonomy, Classroom Practice, Emotional Intelligence, Learning Styles, Thinking Skills

Summary:

This essential training guide to the new third edition of David Sousa's *How the Brain Learns* provides staff developers and teachers with the tools necessary to facilitate a workshop or study group based on the bestselling book. Chapter-by-chapter topics focus on brain research that relates to teaching and learning and how this research can be translated into practical classroom strategies. Key activities from the book include engaging in action research, determining sensory preferences, developing mnemonics, using metaphors to enhance knowledge transfer, making a concept map, putting the arts into lessons, differentiating complexity and difficulty, and putting lesson components together.

Key selling points:

This facilitator's guide features

- Chapter summaries and supplemental information to *How The Brain Learns*
- Discussion questions and journal writing exercises to further stimulate the facilitator's understanding and practical application of *How The Brain Learns*
- Sample workshop agendas and evaluation form

Supporting resources:

- *How The Brain Learns* (CO0965)
- *The Leadership Brain* (CO0701)
- *How The Gifted Brain Learns* (CO0728)
- *How The Brain Learns To Read* (CO071X)
