## Summary:

Build the bridge from data collection to improved instruction.

Students are people – not data. Assessment data can bury you or give you focused information on how to reach every student. *Putting FACES on the Data* shows how to develop a common language for sharing all students' progress with all teachers and leaders and how to use ongoing assessment to inform instruction. Based on worldwide research from over 500 educators, this book presents solutions organised by:

- Assessment
- Leadership
- Instruction
- Ownership

The many benefits of personalising data include increased student engagement and a positive impact on school culture. This reader-friendly guide helps you set goals, adjust lessons, identify students' strengths and weaknesses and implement interventions. Included is a self-assessment framework for implementing improvement at region and state levels. By focusing on connecting all the dots between students and data, you can accomplish the ultimate goal of helping them learn.
