## Summary:

Rick Stiggins details profound changes in the mission of our schools that requires a bold new vision of excellence in the assessment in those schools. He combines decades of experience with international research to define a vision that uses assessment to supercharge student learning, not merely measure it to support student growth, not merely hold schools accountable for it.

## *Revolutionize Assessment:*

- Begins with a unique analysis from the student's point of view of the motivational psychology of being evaluated in the classroom
- Offers strategies for engaging students in self-assessment in ways that maximise their engagement and confidences as they learn
- Details the long-missing conditions of classroom assessment literacy that must be in place in local schools for Rick's vision to become reality
- Reveals how gains in student achievement can narrow achievement gaps when teachers are given the tools needed to use "assessment for learning"
