## Key Selling Points:

- Research-based brain-friendly strategies ready to use in your classroom
- Insight into developing short-term and long-term memory pathways
- Learn to teach effectively for declarative and procedural knowledge

## Summary:

The holistic guide to understanding how the brain acquires, processes and interprets information. This concise look at how the brain learns, remembers and creates meaning will allow every teacher to prepare more effective lesson plans and create reflective learning opportunities for students. Topics include: The cognitive system; How visual, auditory and kinesthetic learners acquire and process information; Working memory and short-term memory; and teaching for declarative and procedural knowledge.
