RRP:	\$55.95
Format:	A4
Age Range:	P-12
Category:	Professional Development
Subject:	Gifted / Brain

Summary:

The second edition of David Sousa's best-selling *How the Gifted Brain Learns* leverages the latest neuroscientific findings to provide teachers with practical strategies for engaging artistically and intellectually advanced learners. This reader-friendly guide enables primary and secondary teachers not only to recognise and challenge their gifted learners, but also to support gifted students who underachieve. Acknowledging that students are often gifted in specific subject areas, the text includes chapters dedicated to talents in language, maths and the arts. Special "From the Desk of a Teacher" sections offer classroom-tested examples of the instructional applications suggested by research.

Supporting Resources:

- How the Brain Influences Behaviour (CO0175)
- How the Brain Learns (CO0965)
- How the Special Needs Brain Learns (CO1171)
- How the Brain Learns Mathematics (CO457X)
