Summary:

Coaching supports teacher development and puts teachers' needs at the heart of the professional learning experience by individualising their own learning and positioning them as professionals. With many different models available, administrators may find it challenging to determine the kind of coaching that best fits the needs of their schools, teachers and students. This fresh, new resource brings together the voices of recognised experts in the field to present unique approaches for coaching teachers and leaders. Comprehensive chapters review the roles of coaches in schools, examine the research base on coaching and provide in-depth discussions of specific approaches to coaching.
