

Hawker Brownlow Education  
Information Sheet  
***Worksheets Don't Grow Dendrites***

Authors: Marcia L. Tate

Date available:	27 April 2005
ISBN:	1 74101 439 5
Code:	CO4395
RRP:	\$32.95
Format:	290 x 210 mm
Extent:	134 pgs
Age range:	professional development
Category:	brain-based learning, learning styles

**Summary:**

Attention spans, subject interest, learning style and even levels of understanding vary from student to student. Just as every student is different, teachers have their own personalities and teaching styles. Yet years of research confirm that certain teaching tools awaken the desire to learn in students by engaging their brains. And once their brains are engaged, synthesis and retention of information will soar!

*Worksheets Don't Grow Dendrites* targets teachers as 'growers of brain cells' and encourages them to make practical applications of the findings of learning style theorists and neuroscientists. Tactile learners, spatial thinkers and logical minds alike will become eager students as the strategies in this handbook are implemented. Imagine raising student achievement by meeting the learning needs of each student and increasing subject matter understanding, all while enjoying teaching and learning.

**Key selling points:**

- Demonstrates 20 strategies for practical application of learning styles that work best.
- Utilises Howard Gardner's theory of Multiple Intelligences.
- Provides examples useful across all subject areas and all age groups.

**Supporting resources:**

- *A Biological Brain in a Cultural Classroom (CO4328)*
- *12 Brain/Mind Learning Principles in Action (CO4387)*
- *Building the Reading Brain, PreK-3 (CO4379)*
