ISBN:	1 74104 441 7
Code:	CO4417
RRP:	\$39.95
Format:	183 x 255 mm
Extent:	163 pgs
Age range:	professional development
Category:	differentiation, brain-based learning

Summary:

In the modern Australian classroom, teachers are faced with the challenge of teaching a rigid curriculum to diverse groups of students, with different cultural backgrounds, home lives, and learning styles. One-size-fits-all lesson plans are just not feasible. *Differentiation Through Learning Styles and Memory* gives an essential overview of how the brain processes, stores and retains information, and provides teachers with a wealth of ideas to help guide students in accessing this information by utilising their individual learning styles and strengths.

From creating a safe and comfortable environment for learning to tailoring lesson plans to visual, auditory and kinesthetic learners, *Differentiation Through Learning Styles and Memory* is a blueprint for a differentiated classroom.

Key selling points:

- Includes detailed scenarios explaining why students learn in different ways, and how to address each of them successfully.
- Suggests simple and effective ways of maximising students' memory skills, increasing their capacity for actual learning.
- Soundly based in current research.

Supporting resources:

- *Differentiated Assessment Strategies (CO4476)*
- *The Differentiated Classroom (199040)*
- *Working with Differentiating Curriculum and Instruction (HB2163)*
- *Fulfilling the Promise of the Differentiated Classroom (103107)*
