

Genetic and Acquired Disorders: Current Topics and Intervention for Educators

Authors: Paul C. McCabe and Steven R. Shaw

Date Available: 8 June 2010
ISBN: 978 1 74239 562 3
Code: CO5623
RRP: \$49.95
Format: A4, 190 pages
Age Range: Years P–12
Category: **Gifted & Learning Disabled**
Subject: Special Needs

Key Selling Points:

- **An easy reference guide to a wide range of afflictions that could affect a student's performance in the classroom, both academically and socially.**
- **Gives educators access to the latest research findings on medical disorders.**

Summary:

This valuable resource gives educators a quick and easy reference guide to a wide variety of genetic and acquired disorders that children in your classroom may be suffering from. The afflictions covered range from rare chromosomal diseases, autism and Celiac Disease to Asthma, food allergies and Diabetes, and many more. Each chapter begins with a case study, which will help teachers to understand some of the behaviours that manifest themselves in the classroom. Based on the most current research, and written for school psychologists, counsellors, administrators and teachers, this resource includes strategies for educators, discussion questions, glossaries and much more.

Supporting Resources:

- Pediatric Disorders: Current Topics and Interventions for Educators (CO5630)
- Psychiatric Disorders: Current Topics and Interventions for Educators (CO5647)
- Academic Instruction for Students With Moderate and Severe Intellectual Disabilities in Inclusive Classrooms (CO5661)
- When Kids Are Grieving (CO4015)
