

Pediatric Disorders: Current Topics and Intervention for Educators

Authors: Paul C. McCabe and Steven R. Shaw

Date Available:	8 June 2010
ISBN:	978 1 74239 563 0
Code:	CO5630
RRP:	\$49.95
Format:	A4, 182 pages
Age Range:	Years P–12
Category:	Gifted & Learning Disabled
Subject:	Special Needs

Key Selling Points:

- An easy reference guide for teachers, covering a wide variety of conditions.

Summary:

In a world where an increasing number of students are affected by a wide range of illnesses and conditions that can negatively impact on their academic performance and development, teachers and other education professionals need to understand the facts regarding these conditions.

This excellent resource gives insights into a wide variety of paediatric disorders, ranging from Shaken Baby Syndrome (SBS), paediatric HIV and Bacterial Meningitis to immunisations, the cognitive effects of childhood leukaemia treatments, sleeping disorders, and many more. Each chapter starts with a case study to engage the reader in the subject matter at hand, and includes thought-provoking questions and specific examples to aid in understanding. Discover how schools can become partners in health care delivery and help students to overcome a wide range of challenges with which they may be afflicted.
