Subject:	Special Education

Key Selling Points:

- An easy reference guide to a wide range of afflictions that could affect a student's performance in the classroom, both academically and socially.
- Gives educators access to the latest research findings on medical disorders.

Summary:

In a world where an increasing number of students are affected by a wide range of psychiatric disorders that can negatively impact on their academic performance and development, teachers and other education professionals need to understand the facts regarding these conditions.

This excellent resource gives insights into a wide variety of psychiatric disorders, ranging from Paediatric Bipolar Disorder, Mood Disorders and Autism Spectrum Disorders to Attention Deficity Hyperactive Disorder, eating disorders and implications of paediatric medications and many more.

Each chapter starts with a case study to engage the reader in the subject matter at hand, and includes thought-provoking questions and specific examples to aid in understanding. Discover how schools can become partners in health care delivery and help students to overcome a wide range of challenges with which they may be afflicted.

Supporting Resources:

- *Genetic and Acquired Disorders (CO5623)*
- *Pediatric Disorders (CO5630)*
- *Academic Instruction for Students With Moderate and Severe Intellectual Disabilities in Inclusive Classrooms (CO5661)*
