Code:	CO636X
RRP:	50.00
Format:	A4, 306 pages
Age Range:	Years 3–8
Category:	Professional Development
Subject:	Science

Summary:

Aligned with standards and written for educators seeking to cultivate learners' sense of discovery and critical thinking skills, *Inquire Within, Second Edition*, focuses on showing teachers how to implement inquiry activities using the three "R's" — restructuring, retooling and reculturing. The author provides examples that match common curricular objectives and demonstrates how teachers can modify current lesson plans rather than creating new ones.

Offering ready-to-use inquiry lessons and teacher-friendly materials for students from Years 3–8, this edition's updates include:

- * Three aspects of inquiry — promoting content knowledge, science process skills and positive attitudes or dispositions
- * A new chapter of suggested investigations with teacher notes
- * Strategies for using inquiry methods with English Language Learners and special education students
- * Activities that incorporate technology

This comprehensive guide is an invaluable resource for practitioners at every level.

Supporting Resources:

- * CO2410 – Teaching High School Science Through Inquiry
- * CO5819 – Integrating Inquiry Across the Curriculum
