**Summary:** Borrowing research from the disciplines of neuroscience, biology and psychology, brain expert Eric Jensen offers an easy to understand explanation of the relationship between learning and the brain. The author shares empirical data and provides in-depth information about the impact of physiological effects, sensory stimuli and emotions on learning. This updated and streamlined edition offers: a set of brain-based principles for informed decision making; low-cost teaching strategies to implement immediately; and easy to follow chapter outlines and text boxes to emphasise key points. Written for teachers, this comprehensive text demonstrates how brain-compatible learning environments can work to optimise learning.
