Summary:

Use the latest research to bring differentiated instruction to today's inclusive classrooms!

Discussing flipped classrooms, response to intervention and technology as differentiated instructional tools, this book has it all! Teachers need 21st century resources that help them provide high-quality differentiated instruction for all students. In this new edition of his best-selling resource, William N. Bender draws on the latest brain research, technology and new educational initiatives to bring a new focus to differentiating instruction.

Educators CAN increase achievement among students with learning disabilities and also foster the development of 21st century skills. This updated guide offers

- Specific strategies for differentiating instruction within an RTI framework
- Ideas for using technology to instruct and assess students with learning disabilities
- Teaching tips and concrete examples of brain-friendly instruction
- Guidance on a range of supportive instructional techniques
- Additional strategies based on the latest research in metacognition
- Up-to-date techniques using Khan Academy, flipped classes and wikis to enhance learning in general and special education settings

This new edition of *Differentiating Instruction for Students With Learning Disabilities* offers the tools and strategies educators need to maximise achievement for all students.

Supporting Resources:

- *Project-Based Learning: Differentiating Instruction for the 21st Century* (CO3900)
- *Differentiating Maths Instruction, 2nd Edition* (CO1106)
- *Neurodiversity in the Classroom: Strength-Based Strategies to Help Students with Special Needs Succeed in School and Life* (113017)
