Summary:

Inspiring Primary Learners offers step-by-step differentiated instructional strategies for creating a learning environment that engages all students, and provides creative strategies that can be easily implemented in the P-6 classroom. The authors demonstrate how to make learning come alive using a number of strategies that are outlined in detail with accompanying examples. Some of these strategies include tiering lessons for children of different capabilities, and allowing children to “chew” information in the ways that suit them best. The book offers examples of lesson plans for all primary levels in subjects English, maths, science, and the humanities. Also included are ideas for assessing before, during and after learning, as well as learning contracts, and learning surveys.
