## Summary:

To assist today's teachers move away from the traditional lecture-based methods of instruction, this user-friendly guide introduces a variety of innovative techniques that will motivate, excite and increase the learning potential of every student.

*Green Light Classrooms* includes contributions from teachers experienced in using a variety of classroom-tested techniques, and provides nine proven strategies designed to create new memory pathways, make content relevant to students, and increase their learning. Teachers can learn techniques that connect with student's emotions, and will be able to increase participation in group discussions and activities. Some of the practical features in this book include:

- Sample lesson plans for different year levels in each chapter
- A collection of practical, brain compatible teaching strategies
- Building blocks for effective instruction, using illustrations, descriptions, analogies and metaphors.

This book offers key principles of effective teaching that can be applied across year levels and in any content area, and shows how it is possible to increase student enthusiasm and impact learning.
