**RRP:** \$35.95  
**Format:** 180x250mm, 196 pages  
**Age Group:** Professional Development  
**Learning Area:** Cross-curricular  
**Category:** Health & Wellbeing

## Summary:

*A Child's Brain: The Need for Nurture* is written to help parents and educators understand children's cognitive development and provide suggestions on how to nurture children to their full potential. A companion to *The Adolescent Brain*, this rich resource:

- Examines the neurobiology of childhood, explaining the body/brain systems that develop during pregnancy, infancy and childhood.
- Explores factors that can enhance or delay development, such as nutrition, family life, relationships, illness, intelligence, technology, creativity and the arts.
- Provides practical suggestions to help adults promote healthy development and successful learning in the children they encounter.
- Includes a glossary of neurobiological terms.

*A Child's Brain* will help parents and teachers to understand the biological, emotional and neurological changes that occur during childhood so they can support children's learning, socialisation and growth.

## Supporting Resources:

- *The Adolescent Brain* (CO5916)
- *A Biological Brain in a Cultural Classroom, Second Edition* (CO4328)
- *How to Explain a Brain* (CO4310)
