Age Range:	P-6; Middle Years
Category:	English, Maths, Science, Primary Hands-on resources, Middle Years
Subject:	English, Maths, Science, Art, Physical Education, Music, Humanities

Summary:

In today's highly diverse classrooms, differentiated instruction enables teachers to plan strategically so they can meet the individual needs of all their students. Now this unique resource makes the challenge of reaching all learners easier by providing teachers with a wide array of practical activities for the differentiated classroom.

Teachers can adjust learning based on individual students' knowledge, skills, experience, preferences and needs by using tested, research-based strategies such as choice boards, cubing, graphic organisers, learning centres, problem-based learning and cooperative learning.

The *Activities for the Differentiated Classroom* series incorporates chapters on English, Maths, Science, Physical Education, Art, Music and Humanities for each year level from prep to Year 6, as well as separate books on Maths, Science and English specifically for the middle years. Each book contains ready-to-use tasks and activities that can be immediately incorporated into lesson plans, and each activity features objectives, materials lists and helpful tips on conducting the activity.
