## Summary:

This series of valuable guides give teachers the tools they need to plan lessons correlated to the way the brain learns best – and to ensure success for all students regardless of their learning style or special challenges! Drawing on classroom-tested, research-based strategies from *Worksheets Don't Grow Dendrites: 20 Instructional Strategies That Engage the Brain*, which is included in this package and also by Marcia Tate, these resources offer a variety of content-specific activities that incorporate graphic organisers and other visuals that reinforce student learning.

Books 1 to 6, for specific year levels from prep to Year 6, incorporate chapters on English, Maths, Science, Physical Education, Arts, Music and Humanities, and there are three separate books on Maths, Science and English, specifically for the for the middle years. Each book contains graphic organisers and visuals such as bar graphs, timelines, concept maps, sequence charts, cause-and-effect charts, Venn diagrams, labeled diagrams and more. Each activity includes step-by-step directions, skills objectives, materials lists and many creative exercises that help students organise and record their learning.

This series of activity books, as well as *Worksheets Don't Grow Dendrites*, feature many practical techniques and processes teachers can use to adjust learning based on individual students' knowledge, skills, experience, preferences and needs. This teacher-friendly guide is sure to be an important resource for any teacher, new or experienced, who wants to help every student in the classroom learn and succeed.
