RRP: \$35.95
Format/Page No.: B5, 192 pages
Year Level: Teachers and Administrators
Focus Area: Differentiated Instruction,
Professional Development
Key Learning Area: Cross-Curricular

Summary

Teachers, Change Your Bait! Brain-Compatible Differentiated Instruction is packed with best-practice ideas and examples for meeting the instructional needs of all your students. A concise explanation of brain-compatible learning theory provides the rationale for why strategies work and why you should start right away!

Fill your strategy tackle box with practical ways to vary the six key components of differentiation:

- **physical** and **social** environment
- **processing** for learning
- **content** and its **presentation**
- **products** to demonstrate learning.

Everything you need to organise a successful differentiated classroom is here, from how to set up students profiles and establish groups, to how to collect ongoing feedback for planning instruction and documenting progress. You will find activities that engage reluctant learners, strategies that will help with “leaving no child behind”, techniques to teach second-language learners and complex tasks to inspire high-potential students.

Make differentiation work in your classroom and every student will experience success.
