Summary:

What are the specific qualities and practices of great principals which elevate them above the rest?

Blending school-centred studies and experience working with hundreds of administrators, author Todd Whitaker reveals fifteen things that the most successful principals do and that other principals do not. This book shows you why these practices are effective, and demonstrates how to implement each of the practices in your school.

This book is not meant to prescribe a narrow set of instructions. Instead, it frames the landscape of school from the perspective of great principals. What do they see when they view their schools and the people in them? Where do they focus their attention? How do they spend their time and energy? What guides their decisions? How can we gain some advantages?

Topics discussed include: studying effective principals, open classrooms, modelling effective interaction, understanding incentives, setting expectations at the start of the year, and many more!
