RRP:	\$69.95
Format:	180 x 255 mm, 346 pp
Age Range:	Professional Development
Category:	Leadership and Learning
Subject:	Professional Development

Key Selling Points:

- ⦿ Over 35 professional learning readings covering topics such as inquiry learning, integration of technology in the classroom, how the brain works and values
- ⦿ Discover how technology is driving the new education paradigm
- ⦿ A theoretical and practical framework for moving school into an era that values innovation and creativity

Summary:

This revolutionary book shows how new technology is driving the second education paradigm that is sweeping into our schools and synthesises all the major education issues into one overarching theoretical and practical framework.

The text provides a rationale for the exponential changes that herald the second education paradigm. Each of the issues are dealt with one by one by addressing curricula, assessment, inquiry learning, the role of technology, professional learning, the competencies, an updated theoretical and practical model for thinking and how the brain works, and the role of attitudes, values, principles and wisdom as we head into an era that values innovation and creativity.
