Summary:

A differentiated curriculum is a program of activities that offers a variety of entry points for students who differ in abilities, knowledge and skills. Differentiation thus allows all students to learn and achieve. *Successful Teaching in the Differentiated Classroom* is the most comprehensive, practical resource you will need to successfully implement the concept of differentiation in your classroom. Following a brief overview of the components, and a teacher self-assessment awareness checklist, are chapters with lesson plans, forms and practical examples for administrators, teachers, students and parents. This comprehensive resource can be used in the school and tertiary classroom, with professional learning communities, as a study group resource and in staff development workshops.
