Format:	A4, 85 pages
Age Range:	P-12
Category:	Professional Development
Subject:	Professional Development

Summary:

Intelligent behaviour makes the difference in fostering able, task-minded learners who are willing and ready to adapt to any challenge. In *An Introduction to Intelligent Behaviours*, Georgette Jenson outlines a unique framework for using the Habits of Mind in schools to enrich the learning experiences of all learners, based on their own strengths and capabilities. Each HoM is fully outlined in its own chapter with relevant Thinking Maps and rubrics. The book is a comprehensive resource for transforming HoM theory into instructional reality, fostering intelligent behaviours in students for a richer learning experience for both the class and the teacher.

Supporting Resources:
