Summary

Can primary students really change the world? Yes, they can – and this book shows them how!

Make the Future! Hands-On Sustainability Lessons for Years 1 & 2 is a cross-curriculum STEM resource that gives real meaning to the idea of sustainability. It contains eight different activities for each year level, designed to supplement Australian Curriculum instruction by addressing the Sustainability cross-curriculum priority, as well as reproducible worksheets and teacher's notes.

Make the Future! features

- STEM-rich activities that support the Australian Curriculum: Mathematics, Science, Technologies, Humanities and Social Sciences, English, Health and Physical Education and The Arts learning areas, as well as the Sustainability cross-curriculum priority
- data from the most up-to-date and credible sources, including the National Sustainability Council, Planet Ark, National Geographic and the Environmental Protection Authority Victoria
- hands-on, practical activities based on traditional skills – students can make their own upcycled accessories, cook planet-friendly (and allergen-free) food, create storage solutions from waste materials and much more
- whole-class, small-group and individual work with options for a range of skill levels
- opportunities for multi-year-level collaboration, self-directed learning and community engagement
- content that actively develops key life skills, such as nutritional knowledge and goal-setting.

Make the Future! brings sustainability to life in the classroom, while empowering your students to make a tangible difference to their future – and to have fun at the same time!
