## Summary:

Open-ended questions provoke thoughtful and investigative responses, and *Open-Ended Maths: Space, Chance and Data* is geared towards doing just that. This book will help primary-school educators use short, innovative tasks based around the main learning theories: Creative and Critical Thinking, Multiple Intelligences, Graphic Organisers, Habits of Mind, Bloom's Taxonomy and Ryan's Thinking Keys. Incorporating a substantive set of task cards covering Space, Chance and Data, this book facilitates better thinking skills and comprehension in the primary-school classroom, incorporating different levels for junior, middle and upper primary years, and special instruction for classrooms with mixed-ability and multi-aged students.
